

BEVISIONEERS

THE MERCEDES-BENZ FELLOWSHIP

Project Checkpoint 9
Theory of Change

Fill out the template

Vision Statement:

Our Vision is to build just communities **by** providing them access to clean, alternative energy sources (currently bio-energy) **through** education and innovative technological interventions **to** reduce health risks, promote equity, and foster a sense of belonging, **ultimately** creating self-sustaining, and resilient communities.

Mission Statement:

BioViL empowers communities to transition to sustainable, clean energy by **educating** about bioenergy solutions, raising **awareness** of their benefits, and **implementing** affordable technologies.

Pathway for Sustainability ::

BioViL focuses its intervention on the Entry Point of “**Energy Decarbonization and Universal Access,**” equipping communities to transition from fossil fuels to clean bioenergy systems that reduce emissions while facilitating access to affordable, reliable energy.

Impact: Resilient rural communities with equitable access to clean energy, reduced deforestation, and improved health.

Better utilization of animal and household waste
